Internet Connection Service Background: Each Internet Connection includes one 10/100 Mb/sec Ethernet connection over Category 5, UTP copper cable with male RJ-45 connector and one static public IP address. StreamLine will provide all configuration information for IP address(es) ordered. Client ordering services is responsible for configuration and operation of PC's, applications software and network hardware connected to network service provided. Unless specifically ordered, exhibitor is responsible for supplying their own network hub/switch and cables. *Each computer utilizing the Internet/Network* ***REQUIRES*** *the purchase of an IP address regardless of whether router, web or proxy server, NAT machine, wireless or private networking is utilized.* By submitting order, client agrees to all terms and conditions on this form and those at terms.streamlinecom.net.
Internet Access Network: Internet Access at the San Jose Convention Center is through a DS-3 (45Mb/sec) circuit from Allegience / XO (30 times the bandwidth of a standard T-1 connection). The high speed data network consists of routers, network switches & equipment from Cisco Systems and Allied Telesyn.
